

Job Notification Form, IIT Delhi

Company Overview

Name: UiPath

Website: uipath.com

Company Type: Core (Technical)

Description: Processing Automation

Job Details

Designation: Product Designer

Type: Other (Product Designer)

Place of Posting: Bangalore

Job Details: In this role, you will be responsible for working on a variety of product initiatives across UiPath. This position is a hands-on role, and you will collaborate and partner with other designers and design leadership to create great designs for your assigned areas. You will bring a focus on technical skills and deliver exceptionally designed experiences, partner with design and product to create great user experiences for all customers, craft design artifacts like scenarios, wireframes, process flows, high-fidelity comps, prototypes, and videos to test, evangelize and deliver your ideas.

The kind of people we're eager to work with are filled with empathy and passion about customers and users, exceptional at using the tools of the trade and have impeccable design skills, tech savvy and detail oriented, but with a sense of humor to make it stick, passionate about doing the right thing.

What you will bring at UiPath: Excellent written and oral communication skills with the ability to engage successfully with many different stakeholders and senior leadership; strong data analysis skills; experience with a broad range of techniques and methodology; proficient with all of the modern design tools and toys; project management skills to prioritize research needs and ensure its successful completion; experienced in design with a proven track record and portfolio to wow us; at least a bachelors in HCI, Design, Architecture or related field, or comparable work experience.

We are looking forward to meet you!
