Job Details

Designation: Data Scientist

Type: Analytics

Place of Posting: Karnataka/Bangalore

Job Details: As a Data Scientist I, you will be working closely with various teams within Customer ML team with an opportunity to build end-to-end data products- from conceptualizing the mathematical problem to solve, assembling relevant data pipelines, iterating on ML/DL methods and taking them to production

What qualities are we looking for?

- Masters degree in areas related to Applied Mathematics, Machine Learning, Statistics, Operations Research
- with 0 to 2 years of industry/research lab experience
- Technically hands-on with deep dive expertise in applying ML to big data
- History of having shipped ML data products
- Results-oriented team player with a strong sense of ownership
- Experience working with software developers, product managers and overall SDLC
- Experience in Deep Learning and previous experience in startups and/or product-based consumer/internet companies is preferred

What will you get to do here?

- A Data/ML Scientist is responsible for solving tough, high-impact problems on the consumer side of things using machine learning, data mining, statistical analysis and related techniques.
- You will be problem solving and would be responsible to deconstruct and formulate solutions from first-principles.
- You would be involved in hands-on programming (intermediate to advanced level PySpark, Python, SQL and beginner level Scala) on big data (familiarity with AWS and open-source ecosystem tools) with the ability to manipulate structured and unstructured data.
- You will have/develop a strong understanding of the business & product and conduct data analysis to derive insights as a precursor formulating the problems and modeling with ML.
