

Job Notification Form, IIT Delhi

Company Overview

Name: FAST RETAILING CO., LTD.

Website: <https://www.fastretailing.com/employment/ja/fastretailing/jp/graduate/global/>

Company Type: Other (Retail)

Description: Fast Retailing is a leading Japanese retail holding company with global headquarters in Tokyo, Japan. There are eight apparel brands in the Fast Retailing Group: UNIQLO, GU, Theory, Helmut Lang, PLST (Plus T), Comptoir des Cotonniers, Princesse tam.tam and J Brand. With global sales of approximately 2.2905 trillion yen for the 2019 fiscal year ending August 31, 2019 (U.S. \$21.53 billion, calculated in yen using the end of August 2019 rate of \$1 = 106.4 yen), Fast Retailing is one of the world's largest apparel retailers. Through LifeWear, a unique concept created by UNIQLO, the company aims to be the ultimate everyday wear brand that makes people's lives richer and more comfortable.

Job Details

Designation: Data Engineer

Type: Analytics

Place of Posting: Tokyo, Japan

Job Details: [Company overview]
Fast Retailing Group aims to become the world's best apparel group by transforming its business operations to "Digital Consumer Retail Company" beyond the retail framework.
We are actively investing in and focusing on Digitizing our operations and transforming the business globally. The IT Department at Fast Retailing is responsible for handling Ecommerce platforms, mobile shopping platforms, inventory management and customer data visualization.
In Fast Retailing we are building microservices to support both store operations and e-commerce operations. Our microservices are core parts of our business.
We offer our talents a career journey in which the goal is to become not just a tech leader, but to be a business leader. By providing diverse experiences at different roles, we expect you to develop a wide view of how the company works and lead Fast Retailing Group with a strong business acumen.

[Job overview]

FAST RETAILING Co., Ltd. is constantly improving the user experience with the aim of improving the user experience, and we believe that data science will make a major contribution to it. There are a wide variety of data sources such as actual stores, e-commerce, mission-critical systems, and microservices of various brands and countries under Fast Retailing. It is imperative for data engineers to create a smart big data platform that can collect and store vast amounts of data safely and accurately while using the latest technology, and to quickly provide high-quality data to data scientists.

As a data engineer, your mission would be building a smart big data infrastructure that can collect and store huge data in the safe, correct approach, and providing high quality data to data scientists quickly using cutting-edge data technology.

[Expected role]

-Construction and operation of big data infrastructure such as Data Lake / Data Catalog / DWH

-Development of data common processing program

-Construction and operation of batch real-time processing system for analysis

-Construction and operation of anomaly detection infrastructure

[Preferred skills and experiences]

-Data analysis backend processing using statistical methods in cloud infrastructure and its operation experience

-Experience in data engineering/ science or other related backend development/ operations

-Cloud familiarity with hadoop ecosystem or worked with large data storage or warehousing solutions including NoSQL, AWS EMR / GCP Bigquery, Elasticsearch, data marts, data lakes, etc.

-Worked with at least one of programming languages including Python, Scala, Java.
