

Job Notification Form, IIT Delhi

Company Overview

Name: Shadowfax Technologies Private Limited

Website: <https://www.shadowfax.in/>

Company Type: Other (Logistics)

Description: Shadowfax is India's leading crowdsourced technology based multi category last-mile express logistics platform, where technology is used to drive supply chain solutions, serving 500+ cities. Shadowfax is the first ever B2B platform which provides an array of products and services to serve multiple categories - including food delivery, multi-city fulfilment, express shipping, same day delivery services, reverse logistics ,online retail (physical goods e-commerce) , Pharma and grocery through a single platform, improving the earnings of delivery partners across the day.

Shadowfax's services range from providing riders for doing a 30-minute delivery to four-day delivery. The company does not hire a delivery fleet – More than 100k+ delivery personnel come online daily for a few hours and pay about US\$1.5 per hour.

4 years into the industry, Shadowfax handles over 500,000 unique orders per day for over 170 clients across 500+ cities. We provide a modular set of e-commerce technologies and logistics solutions to over 7000 pin codes. We are the largest logistics partner for Flipkart, Amazon, Bigbasket and the only player providing outsourced Logistics services to O2O Segment.

Shadowfax has a 60% market share in the outsourced food delivery market and believes it's delivery cost works out lower (vs food delivery players) due to cross-utilization of delivery personnel across different categories and platforms.

Shadowfax has a US\$60 MN annualized revenue run rate currently which it expects to increase to US\$350 MN by FY23

Shadowfax, founded by IIT - Delhi Alumni, Abhishek Bansal, Vaibhav Khandelwal in 2015. Shadowfax's leadership team combines world-class talent and entrepreneurial experience gathered at some of the best companies in the world. The company is well-funded by marquee investors like Eight roads, IFC(financial arm of World Bank), NGP, Mirae Assets and Qualcomm Ventures.

If you value autonomy, enjoy challenges and are passionate and believe in getting things done, experienced Human Resource Business Partners who can turn ideas into reality, and fast and can work with minimal supervision come join us.

Shadowfax has a US\$60 MN annualized revenue run rate currently which it expects to increase to US\$350 MN by FY23.

Our Strong Foundation:

Shadowfax, founded by IIT - Delhi Alumni, Abhishek Bansal, Vaibhav Khandelwal in 2015. Shadowfax's leadership team combines world-class talent and entrepreneurial experience gathered at some of the best companies in the world. The company is well-funded by marquee investors like Eight roads, IFC (financial arm of WorldBank), NGP, MiraeAssets and Qualcomm Ventures.

Working at Shadowfax:

Shadowfax believes in an open, intellectually honest culture where everyone is given the autonomy to contribute and do their life's best work. As a part of the dynamic team at Shadowfax, you will have a chance to learn new things, solve new problems, build your competence and be a part of an innovative design-and tech startup that's revolutionizing the logistics industry. We Foster a culture that values first principle thinking and problem solving, impacts and encourages constructive feedback, engagement, inclusion and diversity at all levels. Our core values define our identity and form the basis of our actions and reflect in everything that we do at Shadowfax. Values enable us to shape the desired organizational culture in which each shadowfaxian can thrive and be at their best.

Role & Responsibilities:

- Manage and develop continuous integration and deployment solutions for production applications across various sites/software
- Manage availability, latency, scalability and efficiency of the platform by engineering reliability into software and systems
- Participate in service capacity planning and demand forecasting, software performance analysis and system tuning
- Participate in the full development lifecycle of creating automated solutions including noiseless alerting and the mitigation of toil and technical debt through code contributions
- Troubleshoot production processing and execute problem resolution through

post-issue evaluations, root-cause analysis and remediation

- Working towards enhancing the existing systems for better performance and stability
- Build durable, stable and efficient software solutions geared towards solving the key business requirements of the organization

You Have:

- Excellent knowledge with Basic Linux OS and Commands
- Experience on scripting with languages like Python or Bash
- Knowledge of any one of the programming languages
- Experience of database platforms such as like MS SQL, MySQL, etc
- Necessary familiarity with network infrastructure, database, cloud and data center operations, and security protocols
- Awareness about devOps
- Understanding infrastructure on any cloud service providers
- Knowledge in system administration & troubleshooting, primarily on Linux platform
- Strong problem-solving skills
- Debugging and troubleshooting skills, with an enthusiastic attitude to support and resolve customer problems
- Willingness to learn new technologies and tool
- Ability to communicate clearly and effectively with business teams
- Excellent team working and communication skills
- Excellent organisational and time management skills
- Understanding about any one version control tools like GIT, Bitbucket, SVN, or CVS

Good to Have:

- Experience with docker, Jenkins and ansible
- Experience with Kubernetes for automating and managing docker deployments
- Experience with AWS
