

Job Notification Form, IIT Delhi

Company Overview

Name: Rivigo

Website: <https://www.rivigo.com/>

Company Type: Core (Technical)

Description: We are a technology-enabled company that is shaping the future of logistics for the world. Founded in 2014, we are transforming the sector with our global-first driver relay model made possible through a unique mix of next generation data science and operational excellence.

Grounded in the mission of making logistics human, we have fundamentally changed the truck driver's job from a 'months-away-from-home' job to a 'day' job. Unlike conventional truck drivers, relay pilots drive from pitstop to pitstop (under 300 kms) and return to their families the same day, thus, creating huge social dividend.

Relay trucking also ensures 50-70% reduction in turnaround time and highest reliability for clients, helping them reinvent their business models – serving new markets, reducing inventory and significantly cutting costs. Listed among the world's top emerging businesses and backed by marquee investors, we are working on a vision to build a completely technology-enabled RaaS (Relay as a service) marketplace to define the way goods move on roads in India and the world

Job Details
