Job Details: NK Securities Research is a leading proprietary trading firm that leverages cutting edge technology and sophisticated algorithms to trade the financial markets. Founded in 2011, we have gained invaluable experience in the field of High Frequency Trading across different asset classes.

Responsibilities:

NK Securities Research is looking for a Python Developer. As a Python Developer you would:

1. Own and be responsible for trading support software modules including design, development, deployment, optimization and support
2. Work closely with the trading teams to create and maintain useful tools for monitoring live market and strategy performance metrics
3. Design and implement post trade analysis for generating business metrics
4. Design and develop software for automating and scaling existing business processes
5. Analyze medium frequency data sets to develop and improve existing medium frequency strategies

Qualifications:

The ideal requirements for candidates are:

1. A degree in Computer Science, Mathematics or Engineering from the top IITs
2. Ability to work under pressure and manage multiple high priority projects
3. Strong Knowledge of Shell and Python scripting
4. Working knowledge of Linux
5. Strong work ethic
6. Excellent problem-solving abilities
7. Good written and oral communication skills

Benefits:

NK Securities Research offers compensation above industry standards for deserving candidates. Exceptional performance is rewarded with a handsome variable bonus going up to 100% of the fixed compensation. We are a fast-growing organization where there is no ceiling on the career trajectory of an individual. The startup style governance of the firm enables the newest employees to work with industry veterans. Our focus is on a premium quality of life and we encourage everyone in the firm to thrive in all aspects of their lives.

Perks:

1. Five weeks of paid vacation
2. Monthly after work parties
3. Catered meals
4. International team outing
