SironLabs is seeking top notch Software Engineers who would participate in our journey of tackling the next big enterprise problem. Ideal candidates would:

- Design and develop highly scalable multi-tenant SaaS services based on micro services architecture, integrate with Big Data analytics, and scale using Dev Ops best practices.
- Craft high-performing, high-quality, maintainable and robust code using Java, Golang or Scala; and Open-Source technologies such as spring.
- Solve complex problems after understanding the broader context.
- Build simple and straightforward solutions without over-engineering.
- Ensure regular code reviews, continuous integration, and high-test code coverage, on-going code refactoring and adequate documentation.
- Write and review unit test plans, tests, and code coverage to ensure high quality delivery.
- Lead, mentor and help up-skill junior members of the development team.

Joining By: 4 April 2022
