

Job Notification Form, IIT Delhi

Company Overview

Name: Taiwan Semiconductor Manufacturing Company

Website: <https://www.tsmc.com/>

Company Type: Core (Technical)

Description: Established in 1987 and headquartered in Hsinchu Science Park, Taiwan, TSMC pioneered the pure-play foundry business model with an exclusive focus on manufacturing customers' products. By choosing not to design, manufacture or market any semiconductor products under its own name, the Company ensures that it never competes with its customers. And so, the key to TSMC's success has always been to focus on its customers' success. TSMC's foundry business model has enabled the rise of the global fabless industry, and since its inception TSMC has been the world's leading semiconductor foundry. The Company manufactured 11,617 different products using 281 distinct technologies for 510 different customers in 2020.

TSMC-made semiconductors serve a global customer base that is large and diverse and includes a wide range of applications. These products are used in a variety of end markets including mobile devices, high performance computing, automotive electronics and the Internet of Things (IoT). Such strong diversification helps to smooth fluctuations in demand, which in turn allows TSMC to maintain higher levels of capacity utilization and profitability, and generate healthy returns for future investment.

The annual capacity of the manufacturing facilities managed by TSMC and its subsidiaries exceeded 12 million 12-inch equivalent wafers in 2020. These facilities include four 12-inch wafer GIGAFAB® fabs, four 8-inch wafer fabs, and one 6-inch wafer fab – all in Taiwan – as well as one 12-inch wafer fab at a wholly owned subsidiary, TSMC Nanjing Company Limited, and two 8-inch wafer fabs at wholly owned subsidiaries, WaferTech in the United States and TSMC China Company Limited.

In May 2020, TSMC announced its intention to build and operate an advanced semiconductor fab in the United States, in order to better support customers and partners there as well as to attract global talents. This facility, to be built in Arizona, will utilize TSMC's 5-nanometer technology for semiconductor wafer fabrication and will have a capacity of 20,000 semiconductor wafers per month. Construction is planned to start in 2021 with production targeted for 2024.

TSMC provides customer support, account management and engineering services through offices in North America, Europe, Japan, China, and South Korea. At the end of 2020, the Company and its subsidiaries employed more than 56,000 people worldwide.

The Company is listed on the Taiwan Stock Exchange (TWSE) under ticker number 2330, and its American Depositary Shares (ADSs) are traded on the New York Stock Exchange (NYSE) under the symbol TSM.

Job Details

Designation: Data Engineer

Type: Information Technology

Place of Posting: Hsinchu City, Taiwan

Job Details:

1. Development and migration to modernized data architecture platform
2. Development and integration of Cloud Computing, Kubernetes or BigData Analytics Systems
3. Development utilities and applications for SRE operation automation.

Requirements:

1. Master degree of Computer Science, Information Management or Electrical Engineering.
2. Familiar with development of Python, JAVA or C/C++ Programming
3. Familiar with data store architecture and data schema design (Oracle, MariaDB, Cassandra, etc.)
3. Familiar with Hadoop, Spark and Parallel Computing
4. The ones with multiple above skill sets and experience will be a plus.
5. Experience with large-scale system integration, cloud computing, social networking for factory automation will be a plus
6. Self-motivated, integrity, aggressive and result-oriented personality.

International: Yes

Joining By: 31 August 2022

Salary Details

CTC: 67,700 USD Per Annum

Gross: 57,203 USD Per Annum

CTC Breakup:

1. Including 12-month base pay, 2-month year-end bonus, profit sharing, 2-month relocation bonus, and months of sign on bonus.
2. Base Salary, year-end bonus are fixed and recurring; Relocation and sign on bonus are one shot paid after onboard.

*Above salary is for Master students, Bachelor students will get different pay.

Perks / Bonus: Mentioned as CTC breakup.

Bond: Yes

Selection Process

Resume Shortlist: Yes

Written Test: No

Online Test: Yes

Group Discussion: No

Medical Test: No

Personal Yes

Interview:

No. of Rounds: 2

No. of Offers: 10

Minimum CGPA: 7.5

Eligibility

Recruiting PHDs: No

Eligible Departments: B.Tech in Biochemical Engineering & Biotechnology, B.Tech in Computer Science & Engineering, B.Tech in Electrical Engineering, B.Tech in Electrical Engineering (Power and Automation), B.Tech in Mathematics & Computing, B.Tech and M.Tech in Biochemical Engg & Biotechnology, B.Tech and M.Tech in Computer Science & Engineering, B.Tech and M.Tech in Mathematics & Computing, M.Tech in Biomedical Engineering, M.Tech in Communications Engineering, M.Tech in Computer Science & Engineering, M.Tech in Computer Technology, M.Tech in Control & Automation, M.Tech in Integrated Electronics & Circuits, M.Tech in Materials Engineering, M.Tech in Polymer Science and Technology, M.Tech in Power Electronics, Electrical Machines & Drives, M.Tech in Power Systems, M.Tech in Radio Frequency Design & Technology, M.Sc in Mathematics, B.Tech in Mechanical Engineering and M.Tech in Computer Science & Engineering, B.Tech in Textile Engineering and M.Tech in Computer Science & Engineering, B.Tech in Engineering Physics and M.Tech in Computer Science & Engineering, B.Tech in Chemical Engineering and M.Tech in Computer Science & Engineering, B.Tech in Production & Industrial Engineering and M.Tech in Computer Science & Engineering, B.Tech in Mechanical Engineering and M.Tech in Computer Science & Engineering, M.S.(R) in Computer Science & Engineering, M.S.(R) in Electrical Engineering, M.S.(R) in Biochemical Engineering and Biotechnology, M.S.(R) in Materials Science and Engineering
