

Job Notification Form, IIT Delhi

Company Overview

Name: Linecraft.ai

Website: <https://linecraft.ai/>

Company Type: Information Technology

Description: A little bit about Linecraft.ai:
Linecraft.AI is a seed funded Industrial IoT product startup started by two serial entrepreneurs in the manufacturing sector with 30+ years of experience in the domain. Our unique technology collects and analyzes large amounts of data from industrial machines and recommends ways to optimize efficiency using machine learning and domain expertise.
Our mission is to help manufacturers squeeze out more productivity from their production lines. We identify opportunities, which are hidden from the human eye, using our one of a kind algorithm. Our product presents these opportunities to the users apart from other features centred around the collected data, augmenting their workflows and empowering them to make informed decisions.
Key customers include Ford, Fiat, Peugeot, CNH and more. The product has already demonstrated unprecedented business value to our early customers. Early employees include alumni from MIT(Boston), BITS (Pilani), IIT (Bombay) & Uppsala (sweden) with experience working at Google, Amazon, Oracle, upGrad etc.

Job Details

Designation: Associate Product Manager

Type: Management

Place of Posting: Maharashtra/Pune

Job Details: Who is the Associate Product Manager at Linecraft.ai?
-The Associate Product manager is responsible for optimizing user engagement and identifying new business opportunities.

You'll be in charge of:

-You'll be working directly with the founders and head of product to optimize user engagement and identify new business opportunities.

-Researching, prototyping and managing the building and testing of new product features with a cross functional team of designers, software engineers and customers.

-Prioritizing development time between different stakeholders like marketing, sales, operations and user facing features.

-Designing quantitative experiments and tracking the success metrics of product features.

-Digging into data from various manufacturing lines and identifying product opportunities .

More about you:

-You have a Bachelors / Masters degree and work experience in the engineering field. A preference will be given to Software Engineers or Computer Science students!

- You are a highly motivated self-starter, technology enthusiast and eager to make an impact.
- You have a proven track record of working on complex projects, preferably having done a software, consulting or product management internship.
- You have demonstrated capabilities in solving unstructured problems in the related industry.
- You have excellent written and oral communication skills.

You're extra awesome if:

- You are proficient in Python with a strong experience and foundation in statistics and SQL.
- You are a start-up enthusiast

Joining By: 1 July 2022
