Job Notification Form, IIT Delhi

Company Overview

Name: Abacus.AI

Website: https://abacus.ai/

Company Type: Information Technology

Description: Abacus.AI is the world's first cloud AI platform that handles all aspects of machine and deep learning at enterprise scale. Abacus.AI has developed several deep-learning techniques and their expert AI system can be used to train custom neural networks based on the use-case and datasets.

Organizations can use these techniques to train models or bring their own ML and DL models and use their state-of-the-art toolset that allows data science teams to wrangle data and build real-time machine and deep learning features.

Our founding team of AI scientists and ML engineers have degrees (many of them Ph. Ds) from premier universities such as Stanford, MIT, CMU, UC Berkeley, Dartmouth, and IIT and have shipped high-profile products at Google, Amazon Web Services, and Uber.

Headquartered in San Francisco, we are funded by Mike Volpi from Index Ventures, Eric Schmidt (ex-CEO and Chairman of Google), Ram Shriram (board member of Google), Coatue, Khosla Ventures, and others.

Job Details

Designation: Software Engineer - Machine Learning

Type: Information Technology

Place of Posting: Mumbai

Job Details: Abacus.AI is the world's first cloud AI platform that handles all aspects of machine and deep learning at enterprise scale. We are a startup headquartered in San Francisco and funded by some. of the top VCs in Silicon Valley. Two of our founders are IIT Bombay alumni. Our team of AI scientists and ML engineers are graduates from premier universities like Stanford, MIT, CMU, UC Berkeley, Dartmouth, and IITs.

We are looking for top talent to join our stellar team of engineers and scientists to work in a fast-paced environment and solve some really tough problems. You should be interested in building

ML/AI models which are in production

New neural network algorithms based on research papers
Low-level performance optimization of deep learning systems
Machine learning platforms
The candidate would be responsible for implementing various algorithms to do automated feature extraction and dataset augmentation, optimizing runtimes of neural network algorithms and building higher-level abstractions for various common AI/ML techniques.

Refer to https://abacus.ai/culture to get a glimpse about our culture.

Abacus.AI is now setting up a team in India. This job is for a position with the team in India.

Joining By: 1 August 2022

Salary Details

CTC:	3,500,000 INR Per Annum
Gross:	3,500,000 INR Per Annum
CTC Breakup:	Basic Salary: 35,00,000

Selection Process

Resume Shortlist:	Yes
Written Test:	No
Online Test:	Yes
Group Discussion:	No
Medical Test:	No
Personal Interview:	Yes
No. of Rounds:	2 rounds of technical interview
No. of Offers:	1

Eligibility

Recruiting PHDs:	No
Eligible	B.Tech in Computer Science & Engineering, B.Tech and M.Tech in Computer

Departments: Science & Engineering
