Job Notification Form, IIT Delhi

Company Overview

Name: McKinsey Knowledge Centre

Website: mckinsey.com

Company Type: Consulting

Description: Our more than 3,500 client capabilities professionals across the globe work alongside our consultants to deliver Change that Matters to our clients. They support our consultant teams, both remotely and at client sites, in an agile and targeted way. Further, they are core to our firm's R&D, developing new knowledge and building and refining proprietary capabilities (e.g., assets, data sets), as well as curating, managing, and maintaining them. Our portfolio includes state-of-the-art research, asset-backed and rapid diagnostics, benchmarking, and workflow support. Our professionals have deep expertise and are able to apply a broad range of methodologies for specialized on-demand analyses.

Our Client Capabilities Network is an exceptional place to have a rewarding career. Around the globe, our talented colleagues build and deploy distinctive intellectual property (IP), tech- and data-enabled assets, and leading expertise alongside or as an integral part of our client teams—helping leading businesses, governments, and institutions.

We are looking for people with diverse educational and professional backgrounds—people who can help build the firm's capabilities and create positive and enduring change through improving the communities in which we work and live. Job Details

Designation: Analyst - CCN Analytics

Type: Consulting

Place of Posting: Gurugram or Chennai

Job Details: Who You'll Work With

You'll work with the CCN Analytics team based in Chennai or Gurgaon. McKinsey Analytics works with leading institutions globally to unlock new sources of value and to drive significant client impact. Our team has world class analytical experience with a successful track record of deploying analytics across clients spanning a range of sectors. The team integrates analytical findings into the business solutions and develops actionable recommendations that are tailor made for client situations.

We are based out of the India Client Capability Network (CCN), which is the largest and the most diverse knowledge hub of McKinsey, and one of the best professional services firms in India. The CCN Knowledge hub of McKinsey has 2500+ members in Chennai and Gurgaon.

What You'll Do

You will work directly with our client service teams globally and be a part of analytics focused engagements across data engineering, visualization, optimization & simulations and machine learning. Your role will involve design and implementation of advanced analytics dashboards, quick turn-around business models, data engineering solutions and predictive and prescriptive analytics to derive business insights and solve complex business problems. This includes gathering and analyzing information, formulating and testing hypotheses, and developing and communicating recommendations. You may also be responsible for presenting results to client management and implementing recommendations with client team members.

You'll have the opportunity to gain new skills and build on the strengths you bring to the firm. You will receive exceptional training as well as frequent coaching and mentoring from colleagues in their teams.

Qualifications

· Post graduate degree in Computer Science, Information Technology or related fields with an excellent academic record

· Prior work experience in building business algorithms/ scenario planners/ simulation engines to solve business problems an added advantage

· Excellent analytical and problem-solving skills, including the ability to disaggregate issues, identify root causes and recommend solutions

· Skills to communicate complex ideas effectively

· Stakeholder management skills with ability to communicate and work with middle to senior management effectively

· Hands-on experience in VBA, SQL/NoSQL, R, Python, etc. preferred
