# Job Notification Form, IIT Delhi

## Company Overview

**Name:** Virohan Pvt. Ltd.

**Website:** [www.virohan.com](www.virohan.com)

**Company Type:** Information Technology

**Description:** Virohan is a Healthcare focused Ed-Tech company training youth for jobs in the healthcare sector. We aim to create India's largest Industry demand-led edtech platform for healthcare professionals. We are funded by Rebright Partners (Japan), elea Foundation for Ethics in Globalization (Switzerland), Artha Impact (Switzerland), Yunus Social Business (an impact fund founded by Noble Laureate Prof. Mohammad Yunus based out of Germany), AngelList, Keiretsu Forum amongst others.

Virohan is operating at the cusp of Edtech and Healthcare. Both these industries have entered a new phase of growth because of the pandemic and will grow rapidly over the next 10 years. The time to enter this space and make your mark is now! We are looking for entrepreneurs to join us and help us build the next edtech unicorn!

## Job Details

**Designation:** Software Engineer

**Type:** Core (Technical)

**Place of Posting:** Gurugram

**Job Details:** Roles & Responsibilities
• Ensure agile test-driven development for robustness, usability, reliability, security and performance.
• Continuously discover, evaluate, and implement new technologies / tools to maximize development efficiency and productivity.
• Drive technical projects and provide leadership in an innovative and fast-paced environment. Take responsibility for the overall planning, execution and success of complex technical projects.
• Partner closely with Product Manager to create, drive and deliver innovative, compelling and user-friendly products. A creative burst of the deep technical insights that PM needs to build the right product for the user.
• Inspire computer science teams to innovate, invent, implement and deploy complex software solutions in a commercial, mission-critical environment.

An ideal candidate:
• holds at least a Bachelor's degree in Computer Science Engineering.
• A thorough tech enthusiast... Lives and breathes tech. S/he doesn't miss the live telecast of I/O, WWDC, F8, TC Disrupt, CES, Strata or any other such major launch. A hacker in his/her free time.
• Very flexible with architecture. Designs and builds for scale. Linear bores him/her. Exponential is how this person thinks. Obviously such a person does not think in terms of language or frameworks.
• Able to break down complex technology architecture into simple layman

language - not even because it's needed - but because that's how well s/he understands it - that's how simple it is for them.
• A data enthusiast. A logic hog. Most likely an atheist who is marvelled with the universe when s/he discovers a pattern in an otherwise seemingly random dataset.
• A core believer that the solution of all human problems lies in tech and in pursuit of singularity. A doer - someone who can hash out more code than 3 people combined the moment s/he visualizes the solution to a complex problem. And get it right in the first go. When s/he codes, you don't need to test it.
• Has strong programming skills – Frontend (HTML, CSS, Bootstrap, AngularJS / ReactJS, JQuery), Backend (Preferred Frameworks: Django, CI / Laravel / Yii 2.0, Spring Boot), OS (Unix - any flavor), DB (SQL, NoSQL), Server Expertise (Nginx, Apache).
• Solid understanding of OOPS, algorithms and data structures.
• Has knowledge of cross-platform mobile-first web development methodologies.
• A champion of solid documentation and testing protocols, including automated testing, across all products.
• Has knowledge of Continuous Integration tools like Jenkins/Travis/Circle CI.
• Has knowledge of data analytics tools such as Elastic (ELK) stack.

**Joining By:**    22 June 2022
